1.-17. (canceled)

18. (previously presented) A light visor for use by an occupant of a machine comprising: a transparent sun screen mounted to the machine such that it can be positioned between the operator and a light source; and wherein the transparent sun screen comprises an electro-metallic layer that can be optionally transitioned between transparent and translucent states.

19. (withdrawn) The light visor of claim 18 wherein the electro-metallic layer is an electro-metallic polymer foil.

20. (withdrawn) The light visor of claim 18 wherein the transparent sun screen comprises a transparent layer onto which the electro-metallic layer is applied.

21. (withdrawn) The light visor of claim 18 wherein the transparent sun screen comprises at least two transparent layers with the electro-metallic layer sandwiched between them.

22. (withdrawn) The light visor of claim 18 wherein a voltage is applied to the electro-metallic layer and wherein the voltage varies based on the amount of light incident on the light visor.

23. (withdrawn) The light visor of claim 18 wherein the electro-metallic layer can be optionally transitioned to a mirrored appearance.

24. (currently amended) The light visor of claim 18 wherein the sun screen displays pictorial information.

25. (currently amended) The light visor of claim 18 wherein the transparent sun screen further comprises an integrated information system.

26. (currently amended) The light visor of claim 18 wherein the sun screen further comprises at least one visual information display.

27. (currently amended) The light visor of claim 18 wherein the sun screen is flexibly mounted to the machine such that it may be movably positioned between the light source and the occupant.

28. (currently amended) The light visor of claim 18 wherein the sun screen is used as a medium for displaying varying visual information.

29. (currently amended) The light visor of claim 18 wherein the sun screen further comprises light filtering materials.

30. (withdrawn) The light visor of claim 18 wherein the sun screen is releasably attached.

31. (withdrawn) The light visor of claim 18 wherein the sun screen is releasably attached as a single component.

32. (withdrawn) The light visor of claim 18 wherein the light visor is reversibly compressible.

33. (withdrawn) The light visor of claim 18 wherein the sun screen is reversibly compressible on one or more of its edges.

34. (withdrawn) The light visor of claim 18 wherein the sun screen is reversibly compressible on one or more of its corners.

35. (withdrawn) The light visor of claim 18 further comprising a light sensor.
